nüvi Demo

The Ultimate Travel Companion

Introducing the nüvi®: A versatile travel assistant that's approximately the size of a deck of playing cards.

The nüvi is a portable GPS navigator, traveler's reference, and digital entertainment system, all in one. Combined with detailed maps, the nüvi provides automatic routing, turn-by-turn voice directions, and finger-touchscreen control—making it easy to find your way anywhere.

Travel Kit™

The nüvi also offers a travel kit of useful travel tools to help keep any journey fun: MP3 player, [audio book player](#) from Audible.com, JPEG picture viewer, world travel clock with time zones, currency converter, measurement converter, and calculator. In addition, optional software packages such as the Language Guide and Travel Guide (sold separately on SD Data cards) can be added for language and content support.

Language Guide™ software (optional)

Users can access an optional Garmin Language Guide, with data provided by Oxford University Press. This software suite contains a multilingual word bank, phrase bank, and five bilingual dictionaries. The multilingual word bank and phrase bank supports nine languages and dialects, including American English, British English, French, German, Italian, Brazilian Portuguese, European Portuguese, European Spanish, and Latin American Spanish. The Language Guide lets travelers look up and translate more than 17,000 words or 20,000 phrases per language. Through the unit's text-to-speech Interface (offered only on the nüvi 350), users can get a spoken pronunciation of each entry in the word bank—along with gender and part-of-speech information.

Travel Guide™ software (optional)

The new Garmin [Travel Guide](#) is loaded with information provided by Marco Polo. These guides put in-depth travel information—such as reviews and recommendations for restaurants, tourist attractions, and more—at the user's fingertips.

Travelers can use the nüvi to navigate to an address or search points of interest (POIs)—places like hotels, restaurants, shopping, and tourist attractions. The nüvi automatically calculates the fastest route and provides voice-prompted turn-by-

turn directions along the way. Thanks to the nüvi's text-to-speech functionality, the unit audibly announces the name of upcoming streets—letting drivers keep their eyes on the road while navigating through busy traffic and tricky roadways. If users stray off course, the nüvi automatically calculates the quickest way to get back on track.

Traffic

The nüvi even provides traffic alerts (in select cities) when used with a compatible traffic receiver. By adding traffic services and a receiver to your nüvi, you can avoid traffic tie-ups by simply pushing a button to calculate a new route.

The nüvi also supports custom points of interest (POIs) and configurable vehicle icons — fun, customized car-shaped icons in a variety of colors that show your position on the map.

The nüvi comes in two configurations:

nüvi 300

This unit is sold exclusively in Europe. (Contact your Garmin European distributor for pricing.) Customers can purchase one of eight regional coverage areas:

- Italy and Greece
- Switzerland, Austria, Eastern France, Northern Italy, and Southern Germany
- Germany and Czech Republic
- U.K. and Ireland
- France
- Spain and Portugal
- Nordics
- Benelux

The nüvi 300 comes with approximately 200 MBs of internal memory for storage of supplemental maps, MP3s, and audio books (available from Audible.com)

nüvi 350

The European version contains full European mapping right off the shelf. North American versions include pre-loaded City Navigator NT maps of the US, Canada, and Puerto Rico.

The nüvi 350's unique "text-to-speech" feature calls out turns by street name. In addition, this text-to-speech interface, gives users the spoken pronunciation of each entry in the word bank—along with gender and part-of-speech information.

The nüvi 350 also comes with an A/C charger and approximately 700 MBs of internal memory for storage of supplemental maps, MP3s, and audio books (available from Audible.com).

MapSource Compatibility

Garmin Recommends:

Select MapSource Product

* denotes limitations

Yes, it really is that simple

Talk about simple. The portable StreetPilot c510 comes ready-to-go right out of the box with preloaded maps and plenty of

options. Sold exclusively in Europe, this navigator delivers the same, easy-to-use, affordable navigation as our popular selling c300 series with many enhancements like optional FM TMC traffic alerts, plus much more.

New c500 series Features

In addition to the simple touch-screen display found in previous versions, the StreetPilot c510 along with its counterparts, the StreetPilot c550 and StreetPilot c530 come loaded with new c500 series features including:

- High-sensitivity GPS receiver – provides faster acquisition times and maintains signal under heavy foliage and near city skyscrapers
- Automotive-grade, sunlight-readable, anti-glare display – makes it easier to see where you're going
- Streamlined design – creates a slimmer, more refined shape
- Configurable vehicle icons – allow you to select a fun, customized car-shaped icon that shows your position on the map
- Garmin Lock™ – anti-theft feature that disables the unit from performing any functions until you type in a specific 4-digit PIN or take the unit to a predetermined location.

GPS Navigator

The c510 comes preprogrammed with regional European map data, and includes automatic routing, and 2D or 3D map perspective, making navigation easy. It also accepts customized points of interest (POIs) such as school zones and safety cameras. Receive optional FM TMC traffic alerts with the purchase of an integrated traffic receiver. By adding traffic services and a receiver to your c510, you can avoid traffic tie-ups by simply pushing a button to calculate a new route.*

In the alternative, the StreetPilot c510D "deluxe" package includes one of nine pre-programmed European map regions and a DVD-ROM with fully unlocked European map coverage. This deluxe version also includes, an integrated traffic receiver which notifies you of traffic, construction and weather delays and automatically suggests alternative routes.

*Traffic services available only in select cities where coverage exists.

design matters

design matters in every aspect of life: family, home, business, faith.

TUESDAY, JULY 18, 2006

Garmin Nuvi 350 Personal Travel Assistant improves with age (and updates)

Once again, we are amazed with the [Garmin Nuvi 350](#). This GPS/Travel assistant gets better with updates, especially the recent [Garmin Nuvi 350 software update](#) adds a load of features (that aren't necessarily indicated in the official list of updates):

- Instead of an arrow, the icon for your vehicle is a car. Delightful, my wife loved that!
- Your indicated path is much wider and easier to see onscreen
- Voice indicator to turn seems to give slightly more warning before you need to turn

I previously reviewed the Garmin Nuvi in [design matters: Review: Garmin Nuvi 350 vs. TomTom Go Personal Travel Assistant](#).

Updating was simple, even on the PC (Hello Garmin, Macintosh support would be a good idea), although even if the user doesn't read the email carefully, one tends to land on the WebUpdater page, and not the software download page.

The interface is still easy to read and navigate, especially the trip details screen. It shows average speed, max speed, total time, stopped time and other indicators, both in a numeric and visual display.

A simple tap on the screen highlights whatever you've touched: roads, cities and other information.

This travel assistant is so simple to use. I highly recommend it. (And if you're interested in buying one, might I recommend Amazon for the [Garmin Nuvi 350](#).

A Small Wonder in Car Navigation

The StreetPilot i3 is the color version in the i-series StreetPilots—a new line of small, inexpensive automotive GPS navigators that make driving fun.

No larger than a baseball and priced affordably, the StreetPilot i-series is destined to be a hit for commuters, college students, and corporate travelers who are looking to experience the ease and enjoyment of GPS satellite navigation for the first time.

Don't let the size fool you: The StreetPilot i-series has many of the same powerful capabilities as our other premium automotive GPS navigators.

The i-series features a unique and convenient click-to-enter scroll wheel and a "back" button which makes it easy to select a destination from the unit's menu-driven interface. The i2 and i3 provide voice-prompted, turn-by-turn directions through a built-in speaker, and the unit easily moves from vehicle to vehicle with an integrated suction cup mount. The i-series will also automatically put drivers back on course if they miss a turn.

The StreetPilot i2 and i3 come with a [MapSource City Select North America NT DVD](#), which contains mapping detail of the entire United States, Canada, and Puerto Rico—featuring nearly six

million points of interest, including hotels, restaurants, gas stations, ATMs, and attractions. Users load the City Select data onto an included 128MB Transflash™ data card via a fast USB connection.

As an added benefit, you can now import customized points of interest with the help of Garmin's free POI Loader software. The possibilities are endless — upload safety cameras or school zones, and you will receive a warning if you are traveling too fast. In addition, an optional proximity-alert feature notifies you of upcoming custom POIs.

The i3 and i5 feature a 32k-color, sunlight readable TFT display with backlight, while the i2 features a high-contrast backlit FSTN monochrome display. Motorists can choose from either a three-dimensional mapping perspective, or overhead "bird's eye" view. For added convenience, drivers can power the unit with either two AA batteries (six hours, typical use) or the included 12-volt adapter cable.

Garmin part number: 010-00434-00

Suggested Retail Price:
\$299.99 U.S.D. (for domestic US market only)

Expected Availability:

October 2005

StreetPilot i3 Features:

- WAAS-enabled, 12 parallel channel GPS patch antenna with MCX-type connector for optional external antenna
- Unit dimensions: 3.00" W x 2.74" H x 2.15" D
- StreetPilot i3 display: 1.7" W x 1.3" H, 220 x 176 pixels, 32k-color sunlight-readable TFT with backlight
- Weighs only 5.3 oz. (without batteries; includes vehicle suction cup mount)
- Audible and visual navigation instructions and warnings
- Includes 128MB TransFlash card for loading detailed maps from the included MapSource City Select North America NT v7 DVD
- Features scroll wheel with click-to-enter, making it quick & easy to navigate
- Offers a three dimensional mapping perspective, or 2-D overhead view
- Battery life: up to 6 hours typical use on two AA batteries (7 hours maximum)
- Includes removable 12-volt power adapter cable for external power while in your vehicle
- Includes a vehicle suction cup mount which allows for easy adjustment and quick release
- USB Interface

MapSource Compatibility

Garmin Recommends:

Select MapSource Product

* denotes limitations

Text-To-Speech and Optional Traffic Capability

The StreetPilot 2720 is a premium GPS automotive navigator that offers text-to-speech and traffic interface capabilities.

In addition to the turn-by-turn voice prompted navigation available in earlier StreetPilot models, the 2720's text-to-speech functionality allows the unit to audibly announce the name of upcoming streets and points of interest (POIs), letting drivers keep their eyes on the road while navigating through busy traffic and tricky roadways.

Monitor traffic tie-ups with the addition of an optional FM TMC traffic receiver. By adding traffic services and a receiver to your StreetPilot 2720, it notifies you of accidents, road construction, and weather-related traffic delays before they are encountered, and then offers an alternate route. Simply touch the screen icon to calculate a new route.

The StreetPilot 2720 also boasts a new WQVGA, color, automotive-grade, sunlight-readable, touchscreen display that automatically adjusts the unit's backlight for optimum viewing in any amount of light. Drivers can view the map in a three-dimensional perspective, or a top-down track-up or north-up view.

The StreetPilot 2720 comes preprogrammed with City Navigator® North America NT maps—containing detailed road maps throughout the entire United States, Canada, and Puerto Rico. This map database features nearly six million POIs—including hotels, restaurants, gas stations, ATMs, and attractions.

As an added benefit, you can now import customized points of interest with the help of Garmin's free POI Loader software. The possibilities are endless—upload safety cameras or school zones, and you will receive a warning if you are traveling too fast. In addition, an optional proximity-alert feature notifies you of upcoming custom POIs.

In addition to point-to-point navigation, the StreetPilot 2720 can calculate the most efficient route between multiple destinations—a real time-saver for realtors, sales forces, and errand-runners. Drivers can also tell the unit to avoid specific areas or road segments when calculating a route.

Garmin part number: 010-00408-02

Suggested Retail Price:

\$969.22 U.S.D. (for domestic US market only)

StreetPilot 2720 features:

- Preloaded maps—ready to use out of the box
- Built-in patch antenna; MCX-type connector for optional external GPS antenna connection
- Turn-by-turn directions
- Supports FM TMC traffic alerting
- Text-to-speech feature delivers street and POI names, as well as addresses, so you can keep your eyes on the road
- Arrange destinations to minimize trip distance—a real time-saver for realtors, sales forces, and errand-runners
- Import custom POIs such as restaurants and safety cameras from industry-standard CSV files
- Proximity-alert feature warns of upcoming custom POIs, such as safety cameras and school zones
- Touch-screen and alphanumeric remote control
- View the map in either a three-dimensional perspective or top-down track-up or north-up view
- 3.8"-diagonal WQVGA color, automotive-grade, sunlight-readable TFT display; 3.3"W x 1.7"H; 454 x 240 pixels
- Unit dimensions: 5.6" W x 3.2" H x 2.0" D
- Weight: .93 pounds
- Built-in photo sensor adjusts for light conditions automatically
- Integrated dash mounting system provides easy adjustment and quick release

POI Loader

POI Loader

[About POI Loader](#)

[POI Sources](#)

[FAQs](#)

Features:

[What is POI Loader?](#)

[What are Points of Interest?](#)

[How does POI Loader work?](#)

[What is Garmin TourGuide™?](#)

[How does TourGuide work?](#)

Import customized points of interest created by others with the help of Garmin's new POI Loader software. In today's fast-paced world, points of interest are ever-changing. With the help of POI Loader, you can now add your favorite new restaurant, or that supermarket having the grand opening, as points of interest (POIs) to your compatible Garmin GPS. The possibilities are endless — upload safety cameras or school zones, and you will receive a warning if you are traveling too fast. In addition, an optional proximity-alert feature notifies you of upcoming custom POIs. Our free, new POI Loader software lets you personalize your GPS, giving you the freedom and flexibility to literally go anywhere.

Product Compatibility

Select your GPS...

As an added benefit to our customers, you can [download the latest version of POI Loader software](#) for free from our website.

What is POI Loader?

POI Loader is free software for your PC that lets you upload customized POIs to your compatible Garmin unit. POI Loader does not create customized POIs, nor is it software for your Garmin GPS. It simply gives you the ability to upload POIs created by others from your PC to your compatible Garmin — making it easy for you to navigate directly to these points of interest.

What are Points of Interest?

POIs include restaurants, hotels, post offices, emergency services, entertainment, plus much more, and are represented by small icons on the maps displayed on your unit. Many of our mapping products, such as MapSource City Select or City Navigator, include a database of nearly 6 million points of interest. With POI Loader, you can now add additional points of interest to your compatible Garmin. This means you can upload custom POIs to supplement the nearly 6 million points of interest that are already in your unit. Traveling on holiday? Upload the POI for that bed & breakfast that just opened or the new restaurant that your guide book recommends.

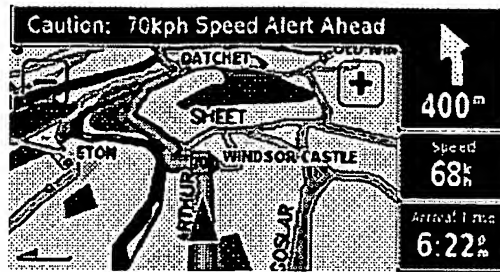

Custom POIs can also include .bmp images, as well as speed and proximity alert information. These POIs can be created by you, your friends, or third parties. There are several free and subscription services on the Internet that also provide POIs. See our [Custom POI Sources web page](#) for links to these third party websites.

How Does POI Loader Work?

POI Loader must first be installed on your PC. After installation, search and navigate to personalized POIs on your PC, and use POI Loader to upload these points of interest from GPX or .CSV files to your compatible Garmin GPS or onto an SD card.

With POI Loader, you can configure your unit to alert you when you are within a certain distance of a point or if you are driving over a certain speed near a point — perfect to warn you about upcoming school zones, red lights, and speed cameras. For more information on POI Loader, see the help file that is included with the [free software download](#).

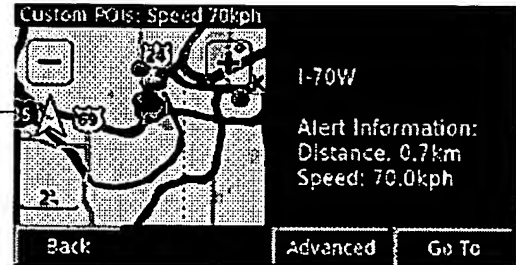

These screens illustrate the proximity alert feature in action:

Click image to enlarge

What is Garmin TourGuide™?

With the latest POI Loader software, third-party developers can create and load special Garmin TourGuide POIs, which turn your compatible Garmin

Click image to enlarge

unit into your own personal, electronic tour guide. These POIs have an audio file associated with them. When you pass by a TourGuide POI with your compatible Garmin unit, the TourGuide audio file begins playing automatically. Garmin TourGuide has so many different applications: you can use it for bus tours, hotels, rentals, real estate sales — the possibilities are endless!

Garmin TourGuide POIs are currently compatible with the nüvi™, zūmo™, and the StreetPilot® c550, 2730, 2820, 7200 and 7500.

How does Garmin TourGuide work?

You must have a compatible Garmin unit with the latest software, the latest POI Loader software, and the latest version of MapSource in order to create and load Garmin TourGuide POIs. Download the latest POI Loader software. Then, consult the POI loader help file for details on how to create and load Garmin TourGuide files to your Garmin unit.

POI Sources

FAQs

With the help of Garmin's free POI Loader software, you can upload additional points of interest to your compatible Garmin. Below are links to several free and subscription services on the Internet that provide these custom POIs.

Our POI Loader supports both GPX and .CSV files. This means you must upload POIs saved in these file formats. Many of the custom POI sources listed below provide points of interest saved in the above file formats or offer POIs that can be converted to POI Loader formats. Please contact the companies below for further information on how to use their POIs with your Garmin unit.
